

THE COOPER UNION

WANTED FOR:

THE ADVANCEMENT OF SCIENCE AND ART

2004

CABLE 82

For members of the class of 2004, the college going years will likely be counted among the most turbulent in American and, indeed, world history. From your vantage point at The Cooper Union campus in Lower Manhattan, you witnessed, first hand, defining moments of that history in the making. While the social, political and economic upheavals of the recent past contributed to the discourse that took place in your classrooms, studios, laboratories and in our historic Great Hall forums, your academic experience has largely been shaped by deeply rooted intellectual traditions, accrued scholarship and an ongoing inquiry into the limitless possibilities of the future.

During your tenure at Cooper, the College itself entered a transformative period in its long and illustrious history. Your collective intellect, creativity and inspiring presence contributed substantially to a new vision for the institution's future: a renewed campus, along with curriculum innovations that will help set the pace for undergraduate education in the twenty-first century. With the support of loyal alumni and friends of the College, whose ranks you now join, Cooper Union's unique mission, including our full tuition scholarship policy, will offer future generations of students the same opportunities that you have had.

Congratulations on earning your degrees from one of the nation's most distinguished institutions of higher education. I'm confident that you, like preceding classes of Cooper graduates, are well prepared to assume the challenges of leadership and social responsibility in a complex and difficult world.

GEORGE CAMPBELL JR.

PRESIDENT

JUDY CHUNG

WANTED FOR: EXCEPTIONAL LAB SKILLS

A man with glasses, wearing a white short-sleeved button-down shirt and a dark tie, stands in a dark, industrial or construction-like environment. He is holding a long, thin, light-colored object, possibly a measuring tape or a tool, in his right hand. The background features vertical wooden studs and a metal frame. The lighting is dramatic, casting shadows on the ground.
